

TIG CLOUD SERVICES

TRANSFORMING YOUR BUSINESS

Cloud computing from TIG: All the benefits, none of the hassle

AtriaCloud, TIG's cloud platform, offers many benefits and comes in many shapes and sizes. Choosing the right cloud services and provider are key to realising capex and opex savings, business agility, flexibility and accessibility. Whether you need a secure public cloud provider or help deploying a private cloud, TIG is uniquely positioned to be your objective partner.

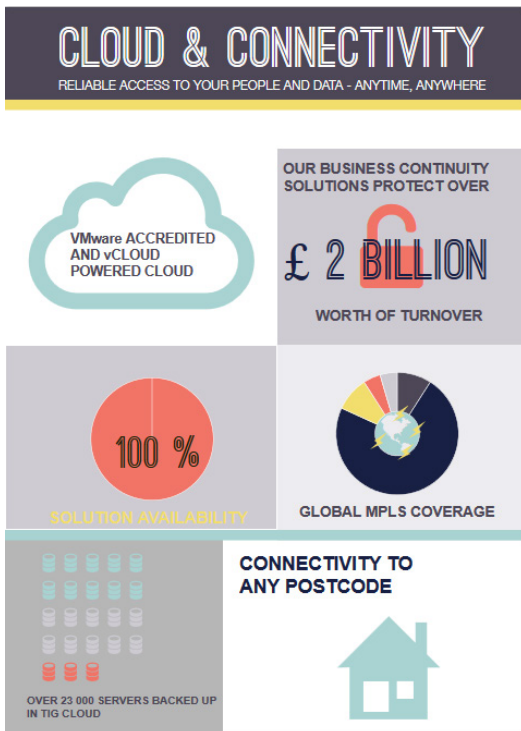

At TIG, we have a long-standing history of **understanding our customers' business and technology needs** - and then we deliver on those needs. It is no different with the cloud.

TIG's Professional Services pedigree coupled with our award-winning Managed Services offering is the blueprint behind our cloud offering, which outperforms the competition based on independent reviews. Total monitoring and maintenance of mission-critical cloud environments reduce the business risks of moving to the cloud so you can proceed with confidence.

Objective consultancy

Public cloud. Private cloud. Hybrid cloud. We offer objective and strategic advice as to whether your applications and business processes should stay on premise or go to the cloud. You can rely on TIG's highly experienced Professional Services team to design a cost-effective and flexible cloud solution that meets your needs based on:

- Data centre or server room overhead cost vs. the cloud
- Age of hardware and support costs
- Investments in existing licenses and technology, such as virtualisation investment in bandwidth and length of contracts
- Security and compliance
- And more.

WHY CHOOSE ATRIAACLOUD?

- Enterprise-grade cloud platform
- Powered by VMware vCloud
- Enterprise-grade Managed Services
- 24x7 monitoring and support of mission critical cloud solutions
- Cost effective and flexible
- Highly secure
- Business Continuity offerings
- Flexible hybrid options tailored to your needs
- Range of connectivity options

TIG CLOUD SERVICES

TRANSFORMING YOUR BUSINESS

Professional Services

With 12 years of Professional Services experience, we are well positioned to transition you to the cloud with minimal risk and hassle to ensure a quick ROI.

Our services include:

- Migration to cloud platforms
- Upgrade to new versions in the cloud for more efficient and cost-effective ways of working
- Hybrid consultancy (on premise vs. cloud)
- Capacity planning (processor, bandwidth, memory, etc.)
- Scalability
- Testing/proof of concept.

Transparency

We want you to feel confident about your move to the cloud, and we want it to be painless. This means offering an open service to all of our clients.

You can see our:

- Hardware platform
- Network topology
- Data centre design and specifications
- Security settings and service
- Monitoring and alerting capabilities
- Processes and procedures.

Guaranteed uptime and SLAs

We guarantee our services with competitive uptime percentages and service-level agreements. You receive dedicated storage, **low virtualisation rates** per processor and an extensive amount of memory.

Security

Security is never an option. Unlike other providers, we provide only a secure connection to the cloud. Top of the range Cisco

Adaptive Security Appliances provide the highest throughput, security encryption levels and firewall protection for all of our cloud services. We also offer identity management and two-factor authentication for remote access to your cloud solutions.

Availability and reliability

Business continuity in our cloud is provided by the use of replication and snapshot technologies both at the storage and VMware layer, ensuring a seamless failover. The network is true 10 GB Ethernet with multiple sites for resiliency. We use the latest Cisco routers, switches and security. Our data centres are located in and out of London and are built to a minimum of Tier 3 compliance.

WE OFFER A FULL PORTFOLIO OF CLOUD SERVICES

- Virtual machines
- Private cloud
- Virtual private data centres
- Hybrid cloud
- AtriaRecover (RaaS)
- UC as a Service
- Software as a Service
- AtriaCapture (BaaS)
- Exchange as a Service
- SharePoint as a Service
- Microsoft Office 365
- Microsoft Azure
- AtriaConnect (Connectivity)
